InstaShow® Family

Launch Wireless Presentations Instantly

No apps, no drivers, no network setup for wireless presentations and conferencing.

InstaShow Lightens the IT Workload

We understand IT wants every meeting to run smoothly. But wireless projection issues often trigger IT calls, pulling you away from your work. That's why we created a wireless presentation solution—free from software updates, driver downloads, or network setup—that delivers fast, stable, and reliable collaboration. With it, you can stay focused, keep meetings on track, and earn trust across the company.

Has Your Team Ever Called You Due to these Common Issues?

Complex Configuration

Complicated software installs, repeated network setups, and firewall issues that interrupt your workflow.

Meeting Interruptions

Visual/audio disruptions slow meetings where the audience must wait, and you have to provide urgent support.

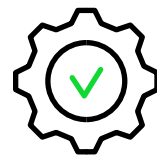

Security Flaws

App or driver-based wireless solution that captures and transmits content, increasing the risk of data leakage.

One Tap to Instantly Start a Hybrid Meeting

With InstaShow create instant wireless conferencing and presentations in every meeting. With a simple one-time deployment, minimal IT department involvement leads to higher overall satisfaction.

Simple Setup. Instant Start with One Tap.

Free from apps, drivers, or network setup and supports multiple signal inputs. Your team can begin every meeting instantly with one tap, saving you from repeated setup requests and urgent calls.

Fast Transmission. Seamless Meetings.

Enjoy smooth 4K UHD transmission with full HDCP and Touchback support, keeping every presentation perfectly in sync and eliminating urgent support calls so you stay focused on higher priorities.

Enterprise-Grade Security. Your Company's Data is Fully Protected.

Free from apps and drivers and compliant with WPA and CVSS standards, InstaShow keeps your company's data protected, helping you safeguard the network and earn company-wide trust.

Speak Your Way. Win Every Meeting.

Whether colleagues are exchanging thoughts on the spot, presenting proposals to overseas headquarters in hybrid meetings, brainstorming new ideas across different teams or locations, collaborating as a group, or leading training sessions, InstaShow follows how they naturally share and discuss—so your colleagues can stay engaged in the conversation.

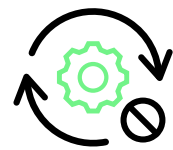

Built for Every Room. Ready for Any Setup.

From huddle spaces to small, mid-sized, and large meeting rooms, InstaShow works seamlessly across different room sizes, regardless of existing layouts or installed AV equipment—even in meeting spaces designed for special purposes without network connectivity—delivering the same simple wireless experience everywhere.

Simple Setup. Instant Start with One Tap.

Free from apps, drivers, or network setup and supports multiple signal inputs. Your team can begin every meeting instantly with one tap, saving you from repeated setup requests and urgent calls.

No Driver Needed

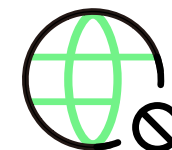

No drivers needed—just plug in and join online meeting instantly.

*Support Windows, macOS, Linux, or ChromeOS systems.

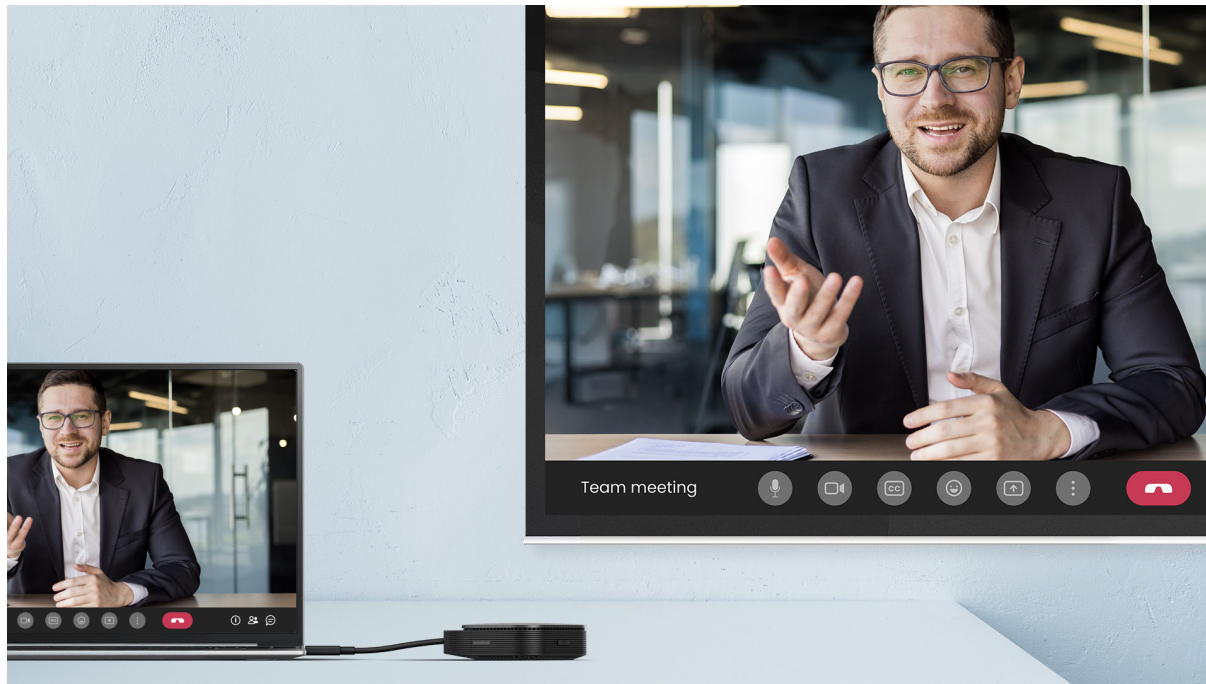

No App Download Required

No software or app required—just plug in and instantly share content during your meeting.

No Network Setup Required

No complex network setup or IT help needed. Receiver, Multimedia Hub and Button pair automatically—just plug and play to start presenting instantly.

Support BYOM Collaboration Solutions

Host wireless videoconference meetings via Zoom, Microsoft Teams, or Google Meet. Plug and play to join BYOM for seamless, cable-free conferencing anywhere.

*Open video conferencing app on your laptop and select the audiovisual device, switch the camera from your laptop to the meeting room, then share content via Host Button.
(Supported by VS25)

4-Way Split Screen

Up to 4 presenters can share ideas on one screen. Works with Windows, Mac, Chrome, and Linux—perfect for fast, efficient multitasking.

Support BYOD Collaboration Solutions

Share wirelessly from your own device with leading screen-mirroring apps*. Join cable-free BYOD meetings with multiple participants anywhere.

*Mirrors from your phone or tablet, find the receiver's SSID in your device's Wi-Fi settings, then connect and cast via wireless screen mirroring technologies from AppleOS / Android / Windows devices
(Supported by VS25 / WDC25)

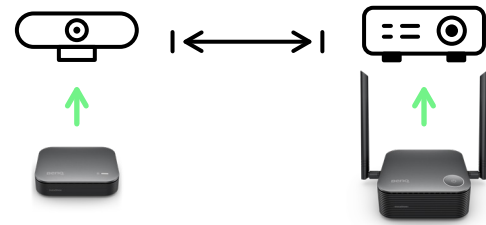

Guest-Friendly Design

Guests can present instantly via HDMI or USB-C—no app or login required. Securely share from any laptop, including MacBook and Chromebook, keeping meetings on track.

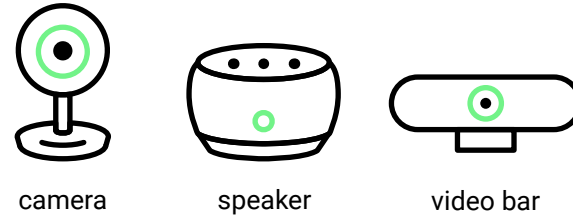

Streamlined Audiovisual Integration for Hybrid Meetings

Multimedia Hub supports various kinds of audiovisual devices for enhanced sound, visuals, and flexible installation—compatible with any device and room setup.
(Supported by VS25)

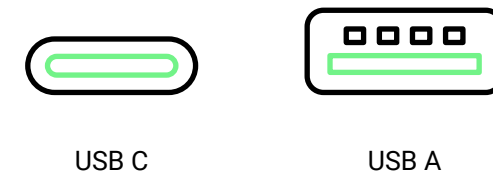

Fits into Your Meeting Room Layout

With its separate wireless Receiver and Multimedia Hub, InstaShow can connect to existing ceiling projectors and mounted video bars and cameras without the need to run additional cables.

Maximum Device Flexibility

Featuring high compatibility, InstaShow works with nearly every major brand of cameras, mics, speakers, or video bars via Multimedia Hub for flexible, seamless communication.

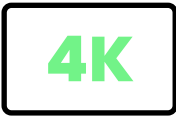

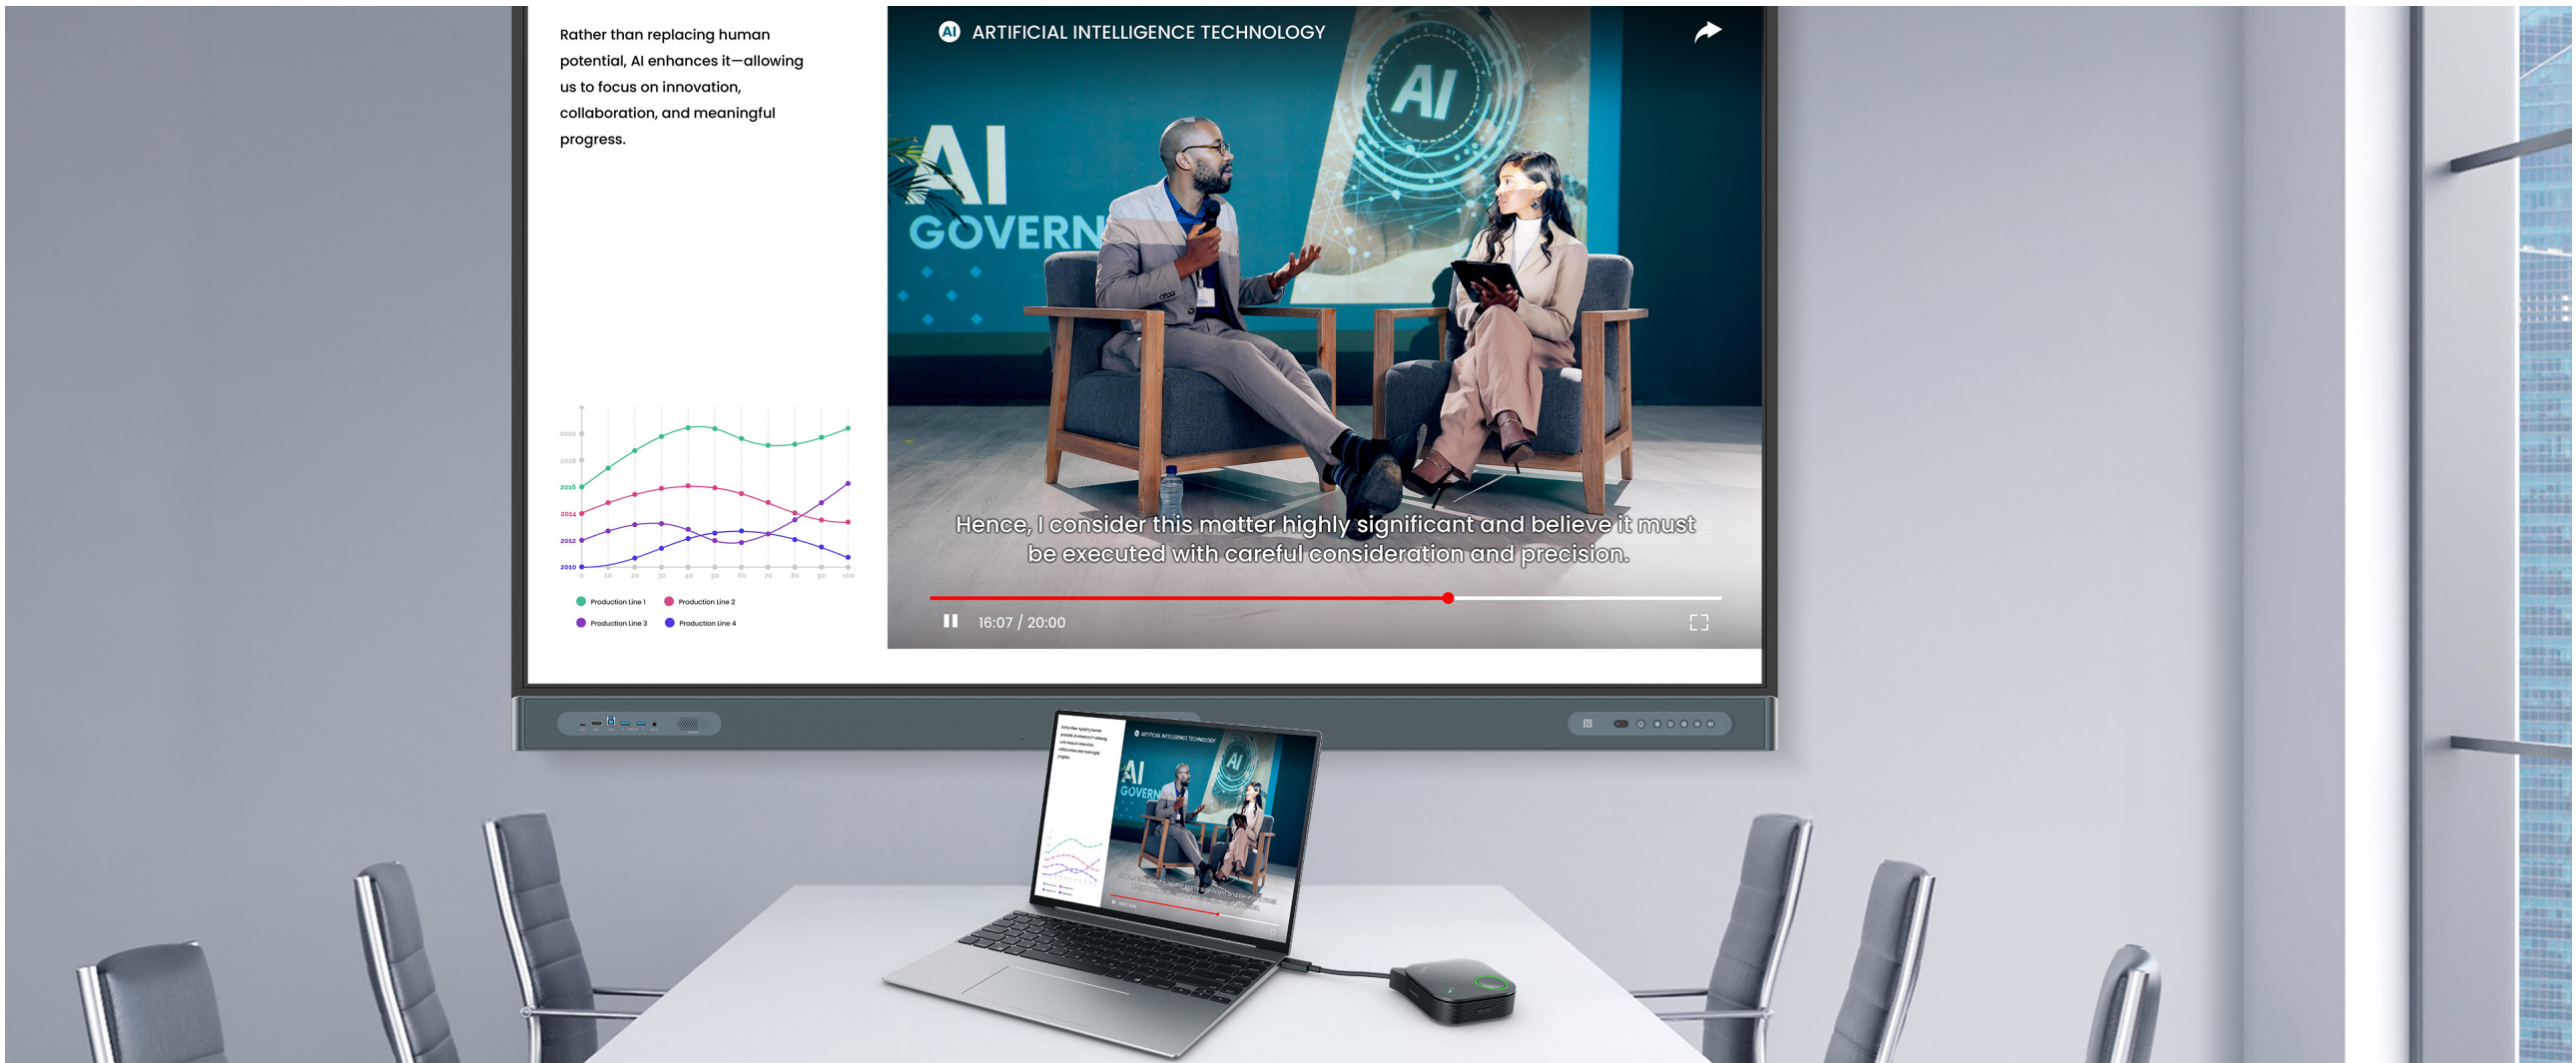

Supports Various Input Sources

USB-C and USB-A ports connect to separate cameras, mics, speakers, or integrated video bars through a Multimedia Hub.

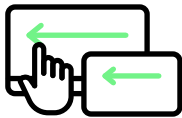

Fast Transmission. Seamless Meetings.

Enjoy smooth 4K UHD transmission with full HDCP and Touchback support, keeping every presentation perfectly in sync and eliminating urgent support calls so you stay focused on higher priorities.

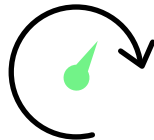

Crisp 4K Transmission Without Lag

Showcase 4K content smoothly, with no distortion or stutter, delivering powerful visuals that convince decision-makers.

Direct Touch Control on Display

Control content right from the interactive display—no interruptions, just smooth and natural interaction.

Smooth Streaming of Protected Content

App-free design boosts PC performance, ensuring smooth, lag-free HDCP content playback for seamless presentations.

Enterprise-Grade Security. Your Company's Data is Fully Protected.

Free from apps and drivers and compliant with WPA and CVSS standards, InstaShow keeps your company's data protected, helping you safeguard the network and earn company-wide trust.

Zero Software or Network Setup

No software or internet needed, minimizing risks and keeping sensitive data safe from breaches and hacks

WPA3 Enterprise Security Protection

WPA3 enterprise encryption secures the receiver-button connection, keeping every presentation safe, secure, and reliable.

(Certified WPA3 WDC15)

HDCP Support

Supports HDCP-encrypted HDMI content, letting presenters connect devices without security errors or blank screens.

CVSS 4.0 Certified Security

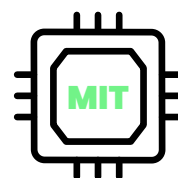

Certified to CVSS 4.0 for guaranteed information security.

Router-Level Chipset

InstaShow uses a MediaTek router-level chipset with automated channel selection to ensure stable streaming support in crowded wireless environments.

(Supported by VS25 / WDC25)

Made in Taiwan

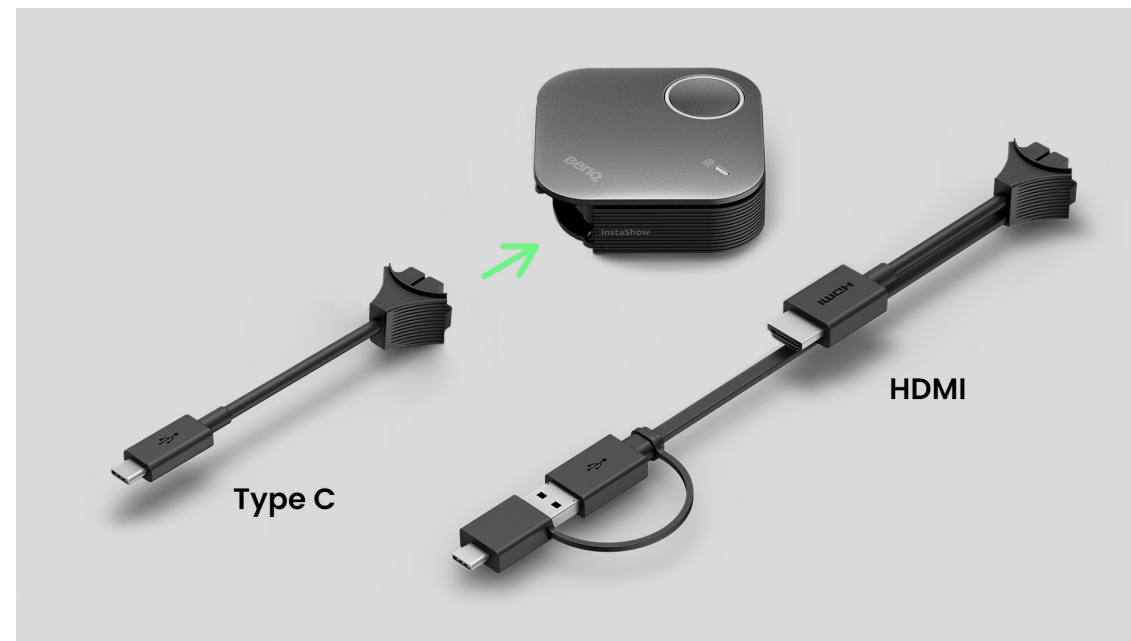

Designed and manufactured in Taiwan, InstaShow uses MediaTek wireless chipsets to ensure secure connections and protect data.

(Powered by MediaTek chipset VS25 / WDC25)
(Powered by Realtek chipset WDC15)

Easy to Manage. Simple to Maintain.

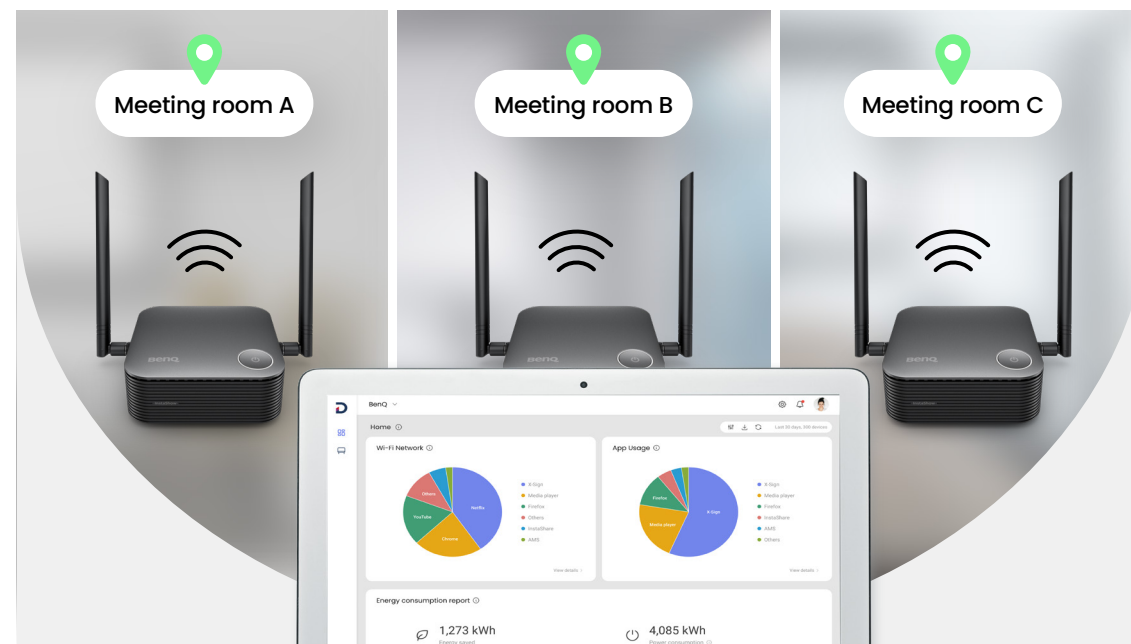

Cloud management and swappable plugs simplify upkeep and streamline control across multiple meeting rooms.

Versatile Connection Design

Quickly switch between HDMI and Type-C with U-magnet bolt design for easy maintenance and seamless device use.

*Uses the Phillips #0 screwdriver to loosen, remove and replace the plug (WDC15)

Manage everything remotely

BenQ's cloud-based DMS lets admins update firmware, monitor, and diagnose multiple InstaShow units remotely from a single dashboard.

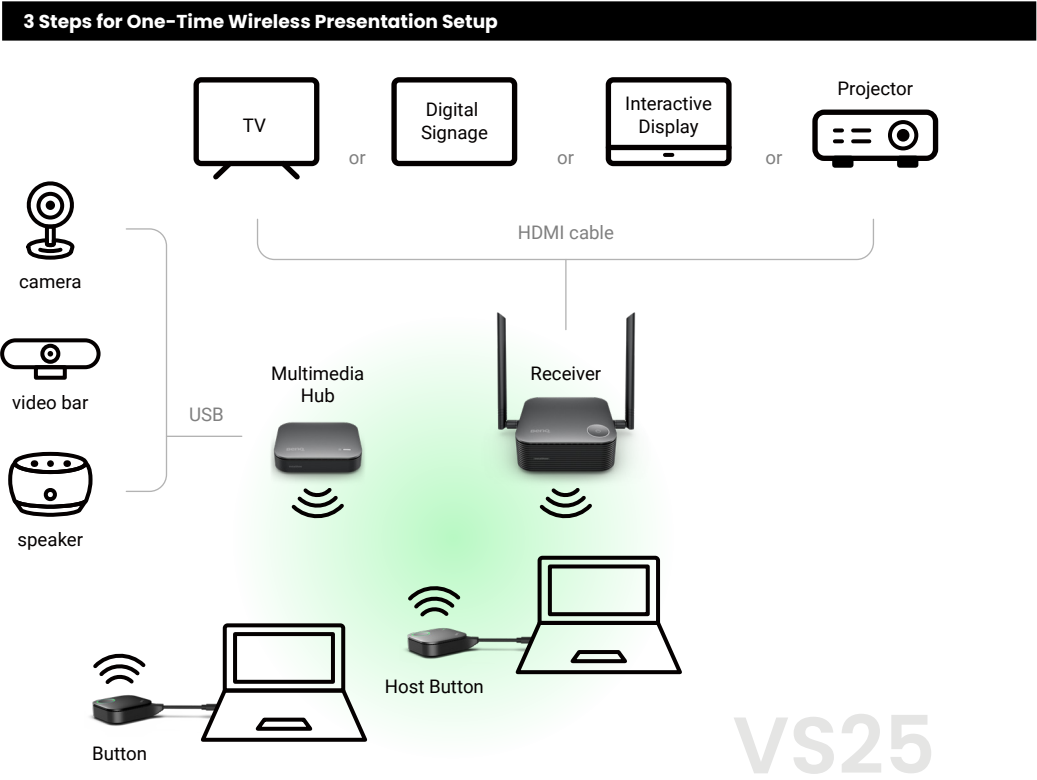

(Supported by VS25 / WDC25)

Conferencing

InstaShow Features	
Advanced Encryption Standard	AES128
BYOD	Apple OS/Android/windows
BYOM	Driver-Free Video conference
Simultaneous connections	64
Maximum Output Resolution (Receiver)	Up to 4K 60Hz (HDMI);Up to 1080p 60Hz (USB-C)
Split Screens (Maximum)	4
TouchBack	Yes
Video Outputs	DP 1.2 (with HDCP);HDMI 2.1 (with HDCP)
WiFi Standard	6
WiFi Protected Access	WPA3 enterprise
Wireless Data Rate (Maximum)	AX3000 (2.4G 574 Mbps + 5G 2400 Mbps)
Wireless Frequency	2.4G + 5G
U-magnet Bolt Design	Yes
Cloud DMS Management	Yes
InstaShow Host Button	
Connector Type	USB Type C
Function Key	Split Screen Key
InstaShow Multimedia Hub	
Power Consumption	3.9W
Power Supply	DC 12V±10%;1.5A
USB-C Port	(x1)
USB-A Port	(x1)
Dimension (WxHxD)	98 x 78 x 25 mm
Weight (Net)	90g

InstaShow Button	
Button Connector Type	USB Type C
Button Function Key	Split Screen Key
InstaShow Host	
Host Power Supply	DC 12V±10%;3A
Host Normal Power Consumption	15W
LAN(RJ45)	(x1)
HDMI out	(x1)
Host Dimensions without antenna	123x123x49.9mm
Host Weight	300g
InstaShow Cradle	
Cradle Dimensions	84.5x62.5x128mm
Cradle Weight	555g
InstaShow Package	
Antenna	2dbi,(x2)
Button (Transmitter)	(x1)
Cradle	(x1)
HDMI cable	(x1)
Host (Receiver)	(x1)
Host Button (Transmitter)	(x1)
Multimedia Hub	(x1)
Power Adapter	(x2)
Safety Statement	N/A
USB Extention Cable	N/A
USB Power Cable	N/A

Set up once—no need to rebuild for every meeting.

- Steps:
1. Connect display to Receiver via HDMI cable and connect video bar to Multimedia Hub via USB cable
 2. Plug Host Button into presenter's laptop, tap the green button and share the content
*Plug Button into another presenter's laptop for seamless content switching
 3. Open video conferencing app on Presenter's laptop and select camera, microphone and speaker
*Support Zoom, Microsoft Teams, or Google Meet applications.
