Migrate meetings to the cloud with
Google Jamboard

Meetings are not the most popular activity at work. Around **47%** of workers agree that there are too many meetings in today's offices.[1] Another **60%** admit that when on conference calls, they multitask on other projects.[2] Based on the evidence, 50% of meeting time is wasted.[3]

Seamless Collaboration: from personal devices and other boards

The cloud-enabled Jamboard app lets users view or contribute to a Jam from their own device and location, moving creativity outside the meeting room. This along with Google Drive integration ensures everyone stays on the same page.

Increase productivity with integrated collaboration tools

With intelligent tools (such as handwriting recognition, shape recognition, image search and more), Jamboard unlocks the creative potential of teams by allowing them to visualize ideas in new ways.

One-touch, full-screen video conferencing

Meet for Jamboard brings full-screen video conferencing to Jamboard, allowing users to join meetings with just one tap. Users can then seamlessly switch between video conferencing and whiteboarding.

Specifications

- 55" 4K UHD Display
- 100 Hz touch scan rate
- 60 Hz video refresh rate
- 400 Hz quarter scan support
- Nvidia TX1 Android CPU/GPU
- Wide-angle camera
- Down firing speakers
- Type C, HDMI 2.0, USB 3.0
- Fine tip passive stylus & eraser

Redesign your Meeting Room with
Google Jamboard

Huddle Room

Space: 2-4 people
Tools: Jamboard

Jamboard was purpose-built for huddle spaces, offering a one-stop tool for team members who need to brainstorm an idea, hash out a presentation concept, or quickly conference in a remote colleague.
Medium-Sized Conference Room

Space: 5-8 people
Tools: Jamboard

Jamboard's 55", 4K screen is highly suited for both presentations and whiteboarding sessions from small groups to medium-sized teams without taking up too much space.

Large-Sized Conference Room

Space: 9-12 people
Tools: Jamboard with HMH

Used in tandem with Hangouts Meet Hardware (HMH), Jamboard becomes a powerful video-conferencing tool for large-sized meetings. HMH includes a touchscreen, speaker mic, camera, and Chromebox for a high-end enterprise videoconferencing experience.
